

## Agreement between ISE and Tool/Service Provider

This document describes an agreement between the **affiliated tool/service provider** and the lead partner INTRASOFT International SA on behalf of the Inspiring Science Education project (Grant agreement no: 325123) to work cooperatively in a strategic alliance to achieve mutual benefits.

### 1. Objective of the Partner Agreement

The main objective of this agreement between the **affiliated tool/service provider** and Intrasoft is to incorporate the tools and/or services provided by **affiliated tool/service provider** in the ISE portal service ([portal.opendiscoveryospace.eu/ise](http://portal.opendiscoveryospace.eu/ise)) as a contribution towards providing as comprehensive and useful a set of tools and services as possible to European science teachers.

### 2. Description of the ISE Project

The mission of the Inspiring Science Education project is to provide digital resources and opportunities for teachers to help them make science education more attractive and relevant to students' lives. Through the Inspiring Science Education website and the activities organised by the partners, teachers help students make their own scientific discoveries, witness and understand natural and scientific phenomena and access the latest, interactive tools and digital resources from within their classrooms.

### 3. Description of the Affiliated Partner

**(insert short, max 100 word, description of the tool/service provider specifically referring to the legally constituted owner of the tool/service)**

### 4. Description of the Tool/Service offered by the Affiliated Partner

**(insert short, max 100 word, description of the tool/service that is the subject of this agreement)**

### 5. Access to the tool /service

The tool/service will be accessible through the Digital Tools Repository (<http://portal.opendiscoveryospace.eu/repository-tool>) and the provided information will follow the ISE eLearning Tool template included in Annex 1.

The tool/service provider will have direct access to the information added to the portal, in order for him/her to be able to change/update any relevant information. The tool/service provider will have direct access to the information added to the portal, in order for him/her to be able to change/update any relevant information.

### 6. Terms and conditions of access

**(insert here if there are specific terms and conditions related to access and use of this tool/service through the portal)**

### 7. Licensing arrangements

**(Insert here the relevant licensing information related to the use of this tool/service, how can the materials be used)**

8. Agreement regarding promotion and communication

Both the **affiliated tool/service provider** and the lead partner Intrasoft on behalf of the ISE project agree to work together to promote the objectives of this agreement.

On the part of ISE this involves the following:

- Carrying a logo and direct link to the tools/service provider on the project website in the relevant affiliated partner section
- Highlighting the availability of the tool/service on the ISE website and social media channels through relevant news stories, announcement, etc

On the part of **affiliated tool/service provider** this involves the following:

- Carrying a logo and direct link to ISE on the tools/service provider website in a suitable location
- Highlighting the availability of the tool/service on the ISE website and social media channels through relevant channels
